Information Disclosure Statement

The information disclosure statement filed December 01, 2003 has been considered and has been made of record.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamamoto et al (USP 4,849,228).

Yamamoto et al (USP 4,849,228) discloses a microcapsule for injectable sustained release which contains an effective amount of ingredients and a biodegradable high molecular polymer useful as an excipient in producing a pharmaceutical preparation comprising a copolymer or homopolymer of about 50-100 mole percent of lactic acid and about 50-0 mole percent of glycolic acid having a weight average molecular weight of about 2,000 to 50,000 and wherein the content of water-soluble low molecular weight compounds (i.e., a monobasic acid) is less than 0.01 mole per 100 gram of said polymer which anticipates the claimed invention. See abstract; claims 1-5; col. 1, lines 48-68; col. 2, lines 3-68; col. 3, lines 1-42, 60-68; col. 4, lines 1-50; the examples; col. 8, lines 50-55.

Art Unit: 1711

Claims 16-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references are cited to show the state of the art of microparticles/microspheres in drug delivery methods; Herrero-Vanerell and Gustavsson.
